Roman Svetlov

Data Scientist

A passionate mathematician and programmer with a strong foundation in algorithms, logic, and problem solving. Excelled in advanced mathematics and computer science, developing skills in analytical thinking and software development through hands-on projects, including a Python-based task management bot, 3D modeling, and robotics. Gained teaching experience by tutoring younger students, improving both technical understanding and communication skills. Passionate about applying math and programming to build innovative tools that solve complex problems and advance automation, data analysis, and education.

Work Experience

Volunteering

October 2022 - April 2023

- Driven to share my knowledge, I taught in my algebra teacher's evening classes, helping younger students solve problems.

Internship

July 2024 - August 2024

- Assisted in project documentation review, verifying cost estimates and material lists to ensure accuracy and compliance with requirements.

Education

Heriot Watt University (Bachelor)

September 2024 - June 2025

Higher School of Economics (Bachelor)

September 2024 - June 2025
